NOTES:

The internal reflector (located behind the frosted glass) comes in white only. Combined with the frosted glass, a white reflector helps provide smooth light output.

The ceiling cutout should be 3 1/2 inches. Any larger will risk the hole being visible.

Damp and wet location rating does not mean water proof. Only mount downlight fixtures in cavity protected from water intrusion. Not for use in car wash or similar applications where the exposed trim will be sprayed with force. If used outdoors, seal the trim piece with latex sealant to block insect intrusion. If insects can get into ceiling cavity, use a Type IC downlight fixture.
